TRAVIS PIROZZINI
FULL-STACK DEVELOPER

tpirozzini@gmail.com Nanaimo, BC, Canada

Full-stack developer with a specialization in front-end and design. I have seven years of operations management and finance experience and currently offer my services as a business consultant. I am perfectionistic, highly-organized and I pride myself on my ability to prioritize tasks to meet project deadlines. I'm consistent and committed, but don't just take my word for it; my GitHub page demonstrates my dedication to the craft.

FEATURED PROJECTS

COMB
This mobile application serves as a shellfish harvesting utility tool. It features a google maps search bar that will provide the user with Tide and Weather information based on their search input. Shellfish icons populate the map and indicate popular harvesting locations. If logged in, a user can post and view status updates on the live message board. An information tab is also available that serves as a shellfish counter while harvesting as well as information and images of local shellfish in the region.
Tech: FIGMA/JS/REACT-NATIVE/FIREBASE/GOOGLE-MAPS - *see the* < **CODE** />

SHIFT WIZARD
Travel the board while absorbing elemental powers. Cast spells to manipulate your path to the ultimate power crystal!
This game was coded with Game Maker Studio 2 during my first GameJam, GM48. **Theme:** Spell Casting.
Tech: GAMEMAKER STUDIO 2 - *see the* < **CODE** />

SPORTS DASHBOARD
This customized hockey league web application showcases an updated "Divisions" feature that allows users to filter through leagues and divisions. This application demonstrates **Responsive Web Design** on desktop, tablet and mobile screen sizes. **Authentication** was implemented through Firebase and allows a logged in admin user to add, edit and delete entries.
Tech: HTML/CSS/JS/*REACT library*/FIREBASE *database, hosting & authentication* - *see the* < **CODE** />

FUN WITH GPT-3
This application utilizes the powerful AI model, GPT-3, created by OpenAI. Enter a prompt and GPT-3 will return a response that is difficult to distinguish from a human! This application showcases **clean-coding** practices and **API implementation**.
Tech: HTML/CSS/JS/REACT/FIREBASE *hosting* - *see the* < **CODE** />
